FORVIA partners for App integration with a major German car manufacturer

Faurecia, a FORVIA Group company, announces a worldwide long-term partnership with Mercedes-Benz Group AG to integrate its apps platform, developed in partnership with Aptoide, into the MBUX multimedia system of one of the global suppliers of premium and luxury cars and vans.

From 2023, the company will provide a customized app portfolio refreshed multiple times per year to enhance user experience.

The Faurecia Aptoide apps platform provides maximum security, privacy and control of content. As the centralized point of contact for a full and evolving app portfolio, Faurecia enables new business models with a variety of third parties. The upgradability of the system allows automakers to bring new content and services online faster and in turn help increase vehicle lifetime by keeping the infotainment offer up to date.

Dr. Ralf Drauz, Managing Director of Faurecia Electronics in Germany, declared: “With the Faurecia Aptoide Automotive App Store, we provide the best market- relevant content in the most standardized and efficient way to OEMs. Already today we are the largest automotive app distributor and are supporting the automotive industry by continually growing our ecosystem. We are excited to provide our apps solution to another great German brand.”
