INTELLIGENCE MILLING PROJECT

Our Company, VALENCIA MÓDULOS DE PUERTA SL, in Spain has successfully developed an innovation project focused on INTELLIGENCE MILLING, which consists of:

- Program is measuring each part before to start the milling operation and it is recalculating the milling program adapting to each part.
- Improvement on the Fit and Finish with the assembly of the rest of components.

This project (EXP IMIDCA/2016/10) has been supported by IVACE from Valencian government. This project has obtained funding from European Regional Development Fund (ERDF).
